for sheets less than 0.5mm thick. Specifications: Thickness and downsizing are usually 0.5mm-1.0mm; Sheet size: 1m *2m or 1.22m*2.44m (special size customizable) used in integrated circuit printing, fluorescent screen electronic mesh, filtration, micro-electrode components, electronics industry substrates, etc. Also used to manufacture signs, trademarks and fine crafts. This formula is used to calculate the weight of a perforated sheet, especially important information when planning transportation. The results are calculated automatically by clicking the Submit button after you have entered all the relevant data. The first box depends on the material selected for the perforated sheet. Please find below the density of the four most common materials used for perforated sheets. Aluminium: 2.70kg/dm³ Brass: 8.55kg/dm³ Steel: 7.92kg/dm³ Stainless Steel: 7.92kg/dm³ Note that these are guide only. We cannot be responsible for any errors in the results of calculations made on this page, for example errors made when entering values or errors in the formula itself. IMS shares a perforated stainless sheet in an amazed hole pattern. Wandering sheets come in different thicknesses and hole sizes different depending on your needs. See the chart below for the different options you have when buying a stainless-perforated sheet. In the Hole Size column, the first number hole is the size of the actual hole, and the second size is how far away the holes are from the center of one hole to the center of the next hole. Industrial metal supply carries perforated sheet metal in a variety of patterns to suit all your decorative and functional needs. We offer round, square, slot, rectangular, aluminum ornamental patterns, steel, stainless steel, making it easy to find the right option for your unique application. & Features Benefits of perforated sheet ten (10) unique punch patterns are available in a variety of measurements and materials high power-to-weight ratio and multifunctional cost-effective weight-power ratio functional and aesthetic ventilation for air, light, sound, Liquid idling gases equates pressure or safety control and security easy to cut and invent crumbled materials sheet steel on stainless steel perforated sheet sizes - specify custom width / length 24 x 36 24 x 48 36 x 48 36 x 48 36 inns x 84 are not 36 are not x 96 x 120 48 x 48 48 x 84 48 x 120 Not all materials or patterns are available in all sizes. Used for a variety of hole sizes, percentage of open spaces, high weight ratio, and aesthetic attraction, A popular sheet for a wide spectrum of uses, such as enclosures, partitions, plaques, guards, screens and more. Not all alloys are available in all formats. See individual product listings for more information and specifications. Specifications.
